

Milwaukee Road Reports Excellent Results With SERVOSAFE® Hot Box Detectives*

Statement by William J. Quinn, President, The Milwaukee Road:

"The Milwaukee Railroad is continually engaged in a search for new technical methods that will expedite train operations, protect ladings and provide improved service to shippers.

"During the past year-and-a-half we have had no derailments of any consequence on our detector protected main line between Milwaukee and Minneapolis, while at the same time many potentially dangerous overheated journal conditions have been reported and cars set out.

"We consider the Hot Box Detective Systems an important factor in attaining this excellent record."

The Milwaukee Road offers evidence of why so many major American railroads are protecting their property and shipping schedules with SERVOSAFE® systems. For information on how these systems can benefit you, contact the address below.

*Protected under one or more of the following U.S. Patent Numbers: 2,880,309, 2,947,857, and 2,963,575. Other U.S. and foreign patents pending.
